**Date:** April 10<sup>th</sup>, 2014

### <Subject>

Using IPS20R6 instead of IPS20R5

### <Information>

When services create orders for IPS20R5, factory will send them IPS20R6.

CN500 position numbered connector, which is used for IPS20R5, will not be used for IPS20R6.

For IPS20R, CN501 position numbered 7-pin-connector will be used.

To adapt 7-pin-connector for product, a cable; **30079746-CNAS 7P-2P/110 SIS W/DC UL1007 AWG24 RHS**, will be sent with the order. Instead of the cable used with 2-pin-connector, this new cable will be used.
