

Service Manual

Microwave Oven

Model: KOC-9Q0T7S

✓ **Caution**

: In this Manual, some parts can be changed for improving, their performance without notice in the parts list. So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center (<http://svc.dwe.co.kr>).

PRECAUTIONS TO BE OBSERVED BEFORE AND DURING SERVICING TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

- (a) Do not operate or allow the oven to be operated with the door open.
- (b) Make the following safety checks on all ovens to be serviced before activating the magnetron or other microwave source, and make repairs if necessary: (1) Interlock operation, (2) Proper door closing, (3) Seal and sealing surfaces (arcing, wear, and other damage), (4) Damage to or loosening of hinges and latches (5) Evidence of dropping or abuse.
- (c) Before turning on power to the microwave oven for any service test or inspection within the microwave generating compartments, check the magnetron, wave guide or transmission line, and cavity for proper alignment, integrity, and connections.
- (d) Any defective or misadjusted components in the interlock, monitor, door seal and microwave generation and transmission systems shall be repaired, replaced, or adjusted by procedures described in this manual before the oven is released to the owner.

1. SAFETY AND PRECAUTIONS

1. FOR SAFE OPERATION

Damage that allows the microwave energy (that cooks or heats the food) to escape will result in poor cooking and may cause serious bodily injury to the operator.

IF ANY OF THE FOLLOWING CONDITIONS EXIST, OPERATOR MUST NOT USE THE APPLIANCE.

(Only a trained service personnel should make repairs.)

- (1) A broken door hinge.
- (2) A broken door viewing screen.
- (3) A broken front panel, oven cavity.
- (4) A loosened door lock.
- (5) A broken door lock.

The door gasket plate and oven cavity surface should be kept clean.

No grease, soil or spatter should be allowed to build up on these surfaces or inside the oven.

DO NOT ATTEMPT TO OPERATE THIS APPLIANCE WITH THE DOOR OPEN.

The microwave oven has concealed switches to make sure the power is turned off when the door is opened.

Do not attempt to defeat them.

DO NOT ATTEMPT TO SERVICE THIS APPLIANCE UNTIL YOU HAVE READ THIS SERVICE MANUAL.

2. FOR SAFE SERVICE PROCEDURES.

1. If the oven is operative prior to servicing, a microwave emission check should be performed prior to servicing the oven.
2. If any certified oven unit is found to servicing, a microwave emission check should be performed prior to servicing the oven.
 - (1) inform the manufacturer, importer or assembler,
 - (2) repair the unit at no cost to the owner,
 - (3) attempt to ascertain the cause of the excessive leakage,
 - (4) tell the owner of the unit not to use the unit until the oven has been brought into compliance.
3. If the oven operates with the door open, the service person should tell the user not to operate the oven and contact the manufacturer immediately.

IMPORTANT

The wire in this mains lead coloured in accordance with the following code.

Green-and-yellow	: Earth
Blue	: Neutral
Brown	: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked with the letter **E** , earth symbol or coloured green-and-yellow.

The wire which is coloured blue must be connected to the terminal which is marked with the letter **N** or coloured black.

The wire which is coloured brown must be connected to the terminal which is marked with the letter **L** or coloured red.

NOTE : This oven is designed for counter-top use only.

2. SPECIFICATIONS

MODEL		KOC-9Q0T7S
POWER SUPPLY		230V~50Hz, SINGLE PHASE WITH EARTHING
POWER CONSUMPTION	MICROWAVE	1400W
	GRILL	1250W
	CONVECTION	1250W
	COMBINATION	2700W
MICROWAVE ENERGY OUTPUT		900W (IEC 705)
MICROWAVE FREQUENCY		2450MHz
OUTSIDE DIMENSIONS (W X D X H)		513X401X311mm(20.2X15.8X12.2 in.)
CAVITY DIMENSIONS (W X D X H)		354X341X231mm(13.9X13.4X9.1 in.)
NET WEIGHT		Approx. 16.6Kg (46.6 lbs.)
TIMER		60 minutes
FUNCTION SELECTIONS		Microwave / Grill / Convection / Combination
POWER SELECTIONS		10 LEVELS
CAVITY VOLUME		0.99 Cu. Ft

* SPECIFICATION ARE SUBJECT TO CHANGE WITHOUT NOTICE.

3. EXTERNAL VIEW

1. OUTER DIMENSION

2. FEATURE DIAGRAM

1. DOOR HOOK

Hook automatically locks and holds the door when the door shuts. If the door opens while the oven is operating, the oven will stop operating immediately.

2. DOOR SEAL

Door seal prevents the microwave leakage from the oven cavity.

3. DOOR VIEWING SCREEN

Food, inside of oven, can be observed through the door viewing screen. It is designed that the microwave cannot pass through the screen.

4. TOP HEATER

Top heater turns on if any of heater related mode operates.

5. OVEN FRONT PLATE

6. CONVECTION INLET

7. OVEN LAMP

Oven lamp turns on anytime the door opens and oven operates.

8. SAFETY INTERLOCK SYSTEM

9. CONTROL PANEL

10. METAL RACK

11. COUPLER

Coupler located at the center of the oven cavity and it couples between the motor and the glass tray.

12. ROLLER GUIDE

Roller guide must be used anytime with the glass tray.

13. GLASS TRAY

Glass tray is made of special heat resistant glass material. It must be always properly fitted with the coupler and the roller guide.

4. INSTALLATION

1. Steady, flat location

This microwave oven should be set on a steady, flat surface.
This microwave oven is designed for counter top use only.

2. Leave space behind and side

All air vents should be kept a clearance. If all vents are covered during operation, the oven may overheat and, eventually, cause failure.

3. Away from Radio and TV sets

Poor television reception and radio interference may result if the oven is located close to a TV, Radio, antenna or feeder and so on.
Position the oven as far from them as possible.

4. Away from heating appliances and water taps

Keep the oven away from hot air, steam or splash when choosing a place to position it, or the insulation might be adversely affected and breakdowns occur.

5. Power supply

- Check your local power source. This microwave oven requires a current of approximately 12 amperes, 230V, 50Hz.
- Power supply cord is about 1.0 meters long.
- The voltage used must be the same as specified on this oven. Using a higher voltage may result in a fire or other accident causing oven damage. Using low voltage will cause slow cooking. We are not responsible for damage resulting from use of this oven with a voltage of ampere fuse other than those specified.
- This appliance is supplied with cable of special type, which, if damaged, must be repaired with cable of same type. Such a cable can be purchased from DAEWOO and must be installed by a Qualified Person.

6. Examine the oven after unpacking for any damage such as:

A misaligned door, broken door or a dent in cavity.
If any of the above are visible, DO NOT INSTALL, and notify dealer immediately.

7. Do not operate the oven if it is colder than room temperature.

EARTHING INSTRUCTIONS

This appliance must be earthed. In the event of an electrical short circuit, earthing reduces the risk of the electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a earthing wire with a earthing plug. The plug must be plugged into an outlet that is properly installed and earthed.

WARNING

Improper use of the earthing plug can result in a risk of electric shock. Consult a qualified electrician or serviceman if the earthing instructions are not completely understood, or if doubt exists as to whether the appliance is properly earthed, and either:
If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade earthing plug, and a 3-slot receptacle that will accept the plug on the appliance.
The marked rating of the extension cord should be equal to or greater than the electrical rating of the appliance, or
Do not use an extension cord.

5. CONTROL PANEL

- ① **Display** : Cooking time, power level, program indicators and present time are displayed.
 MW (☐): When blinking, the oven is operating in MICROWAVE COOK mode.
 Grill (☐): When blinking, the oven is operating in GRILL mode.
 Combi (☐): When blinking, the oven is operating in COMBI mode.
 Convection (☐): When blinking, the oven is operating in CONVECTION mode.
 Defrost (*): When blinking, the oven is operating in DEFROST mode.
 Auto-cook (☐): When blinking, the oven is operating in AUTO COOK mode.
 Warm (☐): When blinking, the oven is operating in WARM mode.
 Steam Cleaning (☐): When blinking, the oven is operating in STEAM CLEANING mode.
 gram (☐): When blinking, the oven is operating in weight input mode.
- ② **Auto cook** : Used to cook or reheat.
- ③ **MW** : Used to set power level of the microwave.
- ④ **Defrost** : Used to defrost foods.
- ⑤ **Grill** : Used to select grill mode.
- ⑥ **Combi** : Used to select combi mode.
- ⑦ **Convection** : Used to select convection mode and selected temp.
- ⑧ **Clock** : Used to set clock.
- ⑨ **STEAM CLEANING** : Used to clean the inside of the oven
- ⑩ **Warm** : Used to keep the food warm.
- ⑪ **Dial knob** : Used to set time, weight and quantity.
- ⑫ **START/SPEEDY COOK** : Used to start a program or a speedy start(each press adds 30 seconds of microwave cooking time).
- ⑬ **STOP/CLEAR** : Used to stop the oven operation or to delete the cooking data.

6. DISASSEMBLY AND ASSEMBLY

- Cautions to be observed when trouble shooting.

Unlike many other appliances, the microwave oven is high-voltage, high-current equipment.

It is completely safe during normal operation. However, carelessness in servicing the oven can result in an electric shock or possible danger from a short circuit.

You are asked to observe the following precautions carefully.

1. Always remove the power plug from the outlet before servicing.
2. Use an insulated screwdriver and wear rubber gloves when servicing the high voltage side.
3. Discharge the high voltage capacitor before touching any oven components or wiring.

(1) Check the earthed.

Do not operate on a two-wire extension cord.

The microwave oven is designed to be used with earthed.

It is imperative, therefore, to make sure it is earthed properly before beginning repair work.

(2) Warning about the electric charge in the high voltage capacitor.

For about 30 seconds after the operation stopped and electric charge remains in the high voltage capacitor. When replacing or checking parts, short between oven chassis and the negative high terminal of the high voltage capacitor, by using a properly insulated screwdriver to discharge.

4. When the fuse is blown out due to the operation of the monitor switch; replace primary interlock switch, secondary interlock switch and interlock monitor switch.
5. After repair or replacement of parts, make sure that the screws are properly tightened, and all electrical connections are tightened.
6. Do not operate without cabinet.

CAUTION : Service personnel should remove their watches whenever working close to or replacing the magnetron.

WARNING : When servicing the appliance, need a care of touching or replacing high potential parts because of electrical shock or exposing microwave. These parts are as follows - HV Transformer, Magnetron, HV Capacitor, HV Diode.

1. To remove cabinet

- 1) Remove five screws on cabinet back.
- 2) Push the cabinet backward.

2. To remove door assembly

- 1) Remove two screws which secure the stopper hinge top.
- 2) Remove the door assembly from top plate of cavity.
- 3) Reverse the above for assembly.

NOTE: After replacing the door assembly, perform a check of correct alignment with the hinge and cavity front plate.

✓ **Caution** : In this Manual, some parts can be changed for improving, their performance without notice in the parts list.
So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center
(<http://svc.dwe.co.kr>).

3. To remove door parts.

REF NO.	PART CODE	PART NAME	DESCRIPTION	Q'TY	REMARK
H36	3511728300	DOOR AS	KOC-9Q0T7S	1	
A01	3511714710	DOOR SEAL AS	KOC-9Q0T7S	1	
A02	3513101900	HOOK	POM	1	
A03	3515101310	SPRING HOOK	HSW-3	1	
A04	3512302410	GASKET DOOR	LUPOL 2300	1	
A05	3515204120	STOPPER HINGE *T AS	KOR-6L0B1A	1	
A06	3517010400	BARRIER-SCREEN *O	GLASS T3.2	1	
A07	3512209610	FRAME DOOR	ABS XR-401 SR-0320	1	

- (1) Remove the gasket door from door plate.
- (2) Remove the door frame from door plate.
- (3) Remove the stopper hinge top from door plate.
- (4) Remove the spring and the hook.
- (5) Remove barrier screen out from door frame.
- (6) Reverse the above steps for reassembly.

4. Method to reduce the gap between the door seal and the oven front surface.

- (1) To reduce gap located on part 'A'.
 - Loosen two screws on stopper hinge top, and then push the door to contact the door seal to oven front surface.
 - Tighten two screws.
- (2) To reduce gap located on part 'B'.
 - Loosen two screws on stopper hinge under, and then push the door to contact the door seal to oven front surface.
 - Tighten two screws.

NOTE : A small gap may be acceptable if the microwave leakage does not exceed 4mW/cm².

✓ **Caution** : In this Manual, some parts can be changed for improving, their performance without notice in the parts list.
So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center
(<http://svc.dwe.co.kr>).

5. To remove control panel parts.

REF NO.	PART CODE	PART NAME	DESCRIPTION	Q'TY	REMARK
H34	3516737100	CONTROL-PANEL AS	KOC-9Q0T7S	1	
B01	3516733720	CONTROL-PANEL	ABS SG-0760D SG-175	1	
B02	3511600910	DECORATOR C-PANEL	ABS H558 SMOG	1	
B03	3516912710	BUTTON FUNCTION-A	ABS SG-0760D SG-175	1	
B04	3516912660	BUTTON FUNCTION-B	ABS SG-0760D SG-175	1	
B05	3516912810	BUTTON FUNCTION-C	ABS SG-0760D SG-175	1	
B06	3511605160	DECORATOR RING	ABS SG-0760D SG-175	1	
B07	3513406090	KNOB VOLUME	ABS SG-0760D SG-175	1	
B08	3514332600	PCB MAIN AS	KOC-9Q0T7S	1	
B09	3514332700	PCB SUB AS	KOC-9Q0T7S	1	
B10	7121301011	SCREW TAPPING	T2S PAN 3X10 MFZN	8	
B11	7122401211	SCREW TAPPING	T2S TRS 4X12 MFZN	4	

- (1) Remove screws securing the PCB MAIN AS.
- (2) Pull out the PCB MAIN AS.
- (3) Remove screws securing the PCB SUB AS.
- (4) Pull out the KNOB VOLUME from the PCB SUB AS.
- (5) Pull out the PCB SUB AS.
- (6) Pull out the BUTTON FUNCTION A, B, and, C.
- (7) Pull out the DECORATOR C-PANEL from the CONTROL-PANEL.
- (8) Reverse the above steps for reassembly.

6. To remove high voltage capacitor.

- 1) Remove a screw which secure the grounding ring terminal of the H.V. diode and the capacitor holder.
- 2) Remove the H.V. diode from the capacitor holder.
- 3) Reverse the above steps for reassembly.

◆ High voltage circuit wiring

7. To remove magnetron.

- 1) Remove three screws which secure the magnetron.
- 2) Remove the magnetron.
- 3) Reverse the above steps for reassembly.

CAUTION : Never install the magnetron without the metallic gasket plate which is packed with each magnetron to prevent microwave leakage. Whenever repair work is carried out on magnetron, check the microwave leakage. It shall not exceed $4\text{mW}/\text{cm}^2$ for a fully assembled oven with door normally closed.

8. To remove wind guide assembly.

- 1) Remove a screw for earthing.
- 2) Remove the noise filter from the wind guide.
- 3) Remove a screw which secure the wind guide assembly.
- 4) Draw forward the wind guide assembly.
- 5) Pull the fan from the motor shaft.
- 6) Remove two screws which secure the motor shaded pole.
- 7) Remove the motor shaded pole.
- 8) Reverse the above steps for reassembly.

9. To remove H.V.transformer.

- 1) Remove four screws holding the H.V.transformer.
- 2) Remove the H.V.transformer.
- 3) Reverse the above steps for reassembly.

✓ **Caution** : In this Manual, some parts can be changed for improving, their performance without notice in the parts list.
So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center
(<http://svc.dwe.co.kr>).

10. To remove fan convection assembly parts.

REF NO.	PART CODE	PART NAME	DESCRIPTION	Q'TY	REMARK
H08	3511801400	FAN CONVECTION AS	KOC-9Q0T7S	1	
C01	3511414400	COVER FAN CONVECTION	SBHG-2 T0.6	1	
C02	3963511420	MOTOR SHADED POLE	230V 50HZ MW10CA-T04	1	
C03	7S432X4081	SPECIAL SCREW	TT3 TRS 4X8 SE MFZN	2	
C04	3511801200	FAN CONVECTION	SBHG T0.5	1	
C05	7400104011	WASHER PLAIN	PW-1-4 MFZN	1	
C06	7S627W40X1	NUT HEX	NUT FLANGE M4X0.7P MFZN	1	

- (1) Remove four screws from the inside of cavity.
- (2) Remove NUT HEX at the center of the fan.
- (3) Remove WASHER PLAIN.
- (4) Remove two screws from the COVER FAN CONVECTION.
- (5) Pull out the MOTOR SHADED POLE.
- (6) Reverse the above steps for assembly.

✓ **Caution** : In this Manual, some parts can be changed for improving, their performance without notice in the parts list.
So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center
(<http://svc.dwe.co.kr>).

11. To remove top heater assembly parts.

REF NO.	PART CODE	PART NAME	DESCRIPTION	Q'TY	REMARK
H44	3512807530	HEATER *T AS	KOC-9Q0T7S	1	
D01	3512805800	HEATER MIRACLON	230V 800W 270MM	1	
D02	3511414500	COVER HEATER *T	SA1D T0.5	1	
D03	3512808200	HEATER REFLECTOR	STS430 T0.4	1	
D04	7123400808	SCREW TAPPING	T2S BIN 4X8 STS	2	
D05	3510611300	BRACKET COVER HEATER	SBHG T0.5	1	
D06	7123400808	SCREW TAPPING	T2S BIN 4X8 STS	1	

- (1) Remove a screw from the BRACKET COVER HEATER.
- (2) Remove the BRACKET COVER HEATER from the COVER HEATER *T.
- (3) Remove the HEATER MIRACLON.
- (4) Remove two screws from the HEATER REFLECTOR.
- (5) Remove the HEATER REFLECTOR from the COVER HEATER *T.
- (6) Reverse the above steps for reassembly.

✓ **Caution** : In this Manual, some parts can be changed for improving, their performance without notice in the parts list.
So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center
(<http://svc.dwe.co.kr>).

12. To remove guide air assembly parts.

REF NO.	PART CODE	PART NAME	DESCRIPTION	Q'TY	REMARK
H45	3512525510	GUIDE AIR AS	KOC-9Q0T7S	1	
E01	3512528410	GUIDE AIR	SAID T0.5	1	
E02	3512806700	HEATER *U	230V 400W TC	1	
E03	3513004400	HOLDER HEATER	STS 301 T0.5	1	
E04	7123400808	SCREW TAPPING	T2S BIN 4X8 STS	1	

- (1) Remove a screw from the GUIDE AIR.
- (2) Remove the HOLDER HEATER from the GUIDE AIR.
- (3) Remove the HEATER *U.
- (4) Reverse the above steps for reassembly.

7. INTERLOCK MECHANISM AND ADJUSTMENT

The door lock mechanism is a device which has been specially designed to completely eliminate microwave radiation when the door is opened during operation, and thus to perfectly prevent the danger resulting from the leakage of microwave.

(1) Primary interlock switch

When the door is closed, the hook locks the oven door. If the door is not closed properly, the oven will not operate.

When the door is closed, the hook pushes the button of the microswitch. Then the button of the primary interlock switch bring it under ON condition. (NO position)

(2) DOM switch and interlock monitor switch

When the door is closed, the hook pushes the lock lever downward. The hook presses the button of the interlock monitor switch to bring it under OFF condition (NO position) and the lock lever presses the button of the DOM switch to bring it under ON condition. (NO position)

ADJUSTMENT :

Interlock monitor switch

When the door is closed, the interlock monitor switch should be opened (NO position) before other switches are closed.
When the door is opened, the interlock monitor switch should be closed (NC position) after other switches are opened.

(3) Adjustment steps

- Loosen the one mounting screw.
- Adjust interlock switch assembly position.
- Make sure that lock lever moves smoothly after adjustment is completed.
- Tighten completely two mounting screws.

NOTE :

Microwave emission test should be performed after adjusting interlock mechanism.
If the microwave emission exceed 4mW/cm^2 , readjust interlock mechanism.

8. TROUBLE SHOOTING GUIDE

Following the procedure below to check if the oven is defective or not.

- 1) Check grounding before trouble checking.
- 2) Be careful of the high voltage circuit.
- 3) Discharge the high voltage capacitor.
- 4) When checking the continuity of the switches, fuse or high voltage transformer, disconnect one load wire from these parts and check continuity with the AC plug removed. To do otherwise may result in a false reading or damage to your meter.

NOTE : When electric parts are checked, be sure the power cord is not inserted the wall outlet.
Check wire harness, wiring and connection of the terminals and power cord before check the parts listed below.

(TROUBLE 1) Oven does not operate at all : any inputs can not be accepted.

NOTE : All these switches must be replaced at the same time, please refer to (7.Interlock mechanism and adjust) for adjustment instructions

(TROUBLE 2)

Display shows all figures selected, but oven does not start cooking, even though desired program and time are set and start button is tapped.

TROUBLE 3) No microwave oscillation even though fan motor rotates.

(TROUBLE 4)**Top heater (main) is not heated; food will not become hot.**

CONDITION	CHECK	RESULT	CAUSE	REMEDY
Main heater is not heated.	Check continuity of primary interlock switch	No continuity	Malfunction of primary Interlock switch	Adjust or replace
	Check continuity of DOM switch	No continuity	Malfunction of DOM switch	Adjust or replace
	Check continuity of heater	No continuity	Defective heater	Replace
	Check D.C voltage being supplied to RELAY (RY3) coil	0V	Defective touch control circuit	Replace
		Approx. 12V DC	Faulty contacts of RELAY (RY3) or open relay coil	Replace

(TROUBLE 5)**1) Top heater (sub) is not heated; food will not become hot.****2) Convection fan motor does no rotate.**

CONDITION	CHECK	RESULT	CAUSE	REMEDY
1)Sub heater is not heated. 2)Convection fan and motor does not rotate.	Check continuity of primary interlock switch	No continuity	Malfunction of primary Interlock switch	Adjust or replace
	Check continuity of DOM switch	No continuity	Malfunction of DOM switch	Adjust or replace
	Check continuity of (heater or motor)	No continuity	Defective heater or motor	Replace
	Check D.C voltage being supplied to RELAY (RY4, RY2) coil	0V	Defective touch control circuit	Replace
		Approx. 12V DC	Faulty contacts of RELAY (RY4,RY2) or open relay coil	Replace

(TROUBLE 6)

The following visual conditions indicate a probable defective touch control Circuit or button P.C.B. assembly

1. Incomplete segments.
 - 1) segment missing
 - 2) partial segments missing
 - 3) digit flickering other than normal fluorescent slight flickering
2. A distinct change in the brightness of one or more numbers exists in the display.
3. One or more digits in the display are not on when they should be.
4. Display does not count down or up with time cooking or clock operation.
5. Oven is programmable and cooks normally but no display shows.
6. Display obviously jumps in time while counting down.
7. Display counts down noticeably too fast while cooking.
8. Display does not show the time of day when clear button is touched.
9. Oven lamp and turn table motor do not stop although cooking is finished.

Check if the RELAY(RY2) contacts close and if they are close, replace touch control circuit.

(TROUBLE 7)

When "ERROR 2 ERROR 3" come on display.

9. MEASUREMENT AND TEST

1. MEASUREMENT OF THE MICROWAVE POWER OUTPUT

Microwave output power can be checked by indirectly measuring the temperature rise of a certain amount of water exposed to the microwave as directed below.

PROCEDURE

1. A cylindrical container of borosilicate glass is used for the test. It has a maximum thickness of 3mm, an external diameter of approximately 190mm and a height of approximately 90mm. The mass of the container is determined.
2. At the start of the test, the oven and the empty container are at ambient temperature. Water having an initial temperature of $10^{\circ}\text{C} \pm 1^{\circ}\text{C}$ is used for the test. The water temperature is measured immediately before it is poured into the container.
3. A quantity of $1000\text{g} \pm 5\text{g}$ of water is added to the container and its actual mass obtained. The container is then immediately placed in the centre of the oven shelf, which is in its lowest normal position. The oven is operated and the time for the water temperature to attain $20^{\circ}\text{C} \pm 2^{\circ}\text{C}$ is measured. The oven is then switched off and the final water temperature is measured within 60s.

NOTE 1 - The water stirred is before its temperature is measured.

NOTE 2 - Stirring and measuring devices are to have a low heat capacity.

4. The microwave power output is calculated from the formula

$$P = 4,187 \cdot m_w(T_2 - T_1) + 0.55 \cdot m_c(T_2 - T_0)/t$$

where

- P is the microwave power output, in watts ;
 m_w is the mass of the water, in grams ;
 m_c is the mass of the container, in grams ;
 T_0 is ambient temperature, in degrees Celsius ;
 T_1 is the initial temperature of the water, in degree Celsius ;
 T_2 is the final temperature of the water, in degrees Celsius ;
 t is the heating time, in seconds, excluding the magnetron filament heating-up time.

* The microwave power output is stated in watts, rounded off to the nearest 50W

CAUTION

1. Water load should be measured exactly to 1 liter.
2. Input power voltage should be exactly specified voltage (Refer to 2. SPECIFICATIONS).
3. Ambient temperature should be $20 \pm 2^{\circ}\text{C}$ ($68 \pm 3.6^{\circ}\text{F}$)

* Heating time for power output: ($T_2 = T_0$)

A (second)	70	64	60	56	52	49	47	44	42	40	38
B (W)	600	650	700	750	800	850	900	950	1000	1050	1100

2. MICROWAVE RADIATION TEST

WARNING

1. Make sure to check the microwave leakage before and after repair of adjustment.
2. Always start measuring of an unknown field to assure safety for operating personnel from microwave energy.
3. Do not place your hands into any suspected microwave radiation field unless the safe density level is known.
4. Care should be taken not to place the eyes in direct line with the source of microwave energy.
5. Slowly approach the unit under test until the radiometer reads an appreciable microwave leakage from the unit under the test.

PROCEDURE

1. Prepare Microwave Energy Survey Meter, 600cc glass beaker, and glass thermometer 100°C (212°F).
2. Pour 275cc $\pm$ 15cc of tap water initially at 20 $\pm$ 5°C (68 $\pm$ 9°F) in the 600 cc glass beaker with an inside diameter of approx. 95 mm(3.5 in.).
3. Place it at the center of the tray and set it in a cavity.
4. Close the door and operate the oven.
5. Measure the leakage by using Microwave Energy Survey Meter with dual ranges, set to 2450MHz.
 - 1) Measured radiation leakage must not exceed the value prescribed below. Leakage for a fully assembled oven with door normally closed must be less than 4mW/Cm².
 - 2) When measuring the leakage, always use the 5 cm (2 in.) space cone with probe. Hold the probe perpendicular to the cabinet and door. Place the space cone of the probe on the door, cabinet, door seem, door viewing screen, the exhaust air vents and the suction air vents.
 - 3) Measuring should be in a counter-clockwise direction at a rate of 1 in./sec. If the leakage of the cabinet door seem is unknown, move the probe more slowly.
 - 4) When measuring near a corner of the door, keep the probe perpendicular to the areas making sure the probe end at the base of the cone does not get closer than 2 in. from any metal. If it does not, erroneous reading may result.

3. COMPONENT TEST PROCEDURE

- High voltage is present at the high voltage terminal of the high voltage transformer during any cooking cycle.
- It is neither necessary nor advisable to attempt measurement of the high voltage.
- Before touching any oven components or wiring, always unplug the oven from its power source and discharge the capacitor.

1. High voltage transformer

- 1) Remove connections from the transformer terminals and check continuity.
- 2) Normal readings should be as follows :
 - Secondary winding ... Approx. $168\ \Omega \pm 10\%$
 - Filament winding ... Approx. $0\ \Omega$
 - Primary winding ... Approx. $1.97\ \Omega$

2. High voltage capacitor

- 1) Check continuity of capacitor with meter on the highest OHM scale.
- 2) A normal capacitor will show continuity for a short time, and then indicate 10MW once the capacitor charged.
- 3) A shorted capacitor will show continuous continuity.
- 4) An open capacitor will show constant 10M Ω
- 5) Resistance between each terminal and chassis should be infinite.

3. High voltage diode

- 1) Isolate the diode from the circuit by disconnecting the leads.
- 2) With the ohmmeter set on the highest resistance scale measure the resistance across the diode terminals. Reverse the meter leads and again observe the resistance reading. Meter with 6V, 9V or higher voltage batteries should be used to check the front-back resistance of the diode, otherwise an infinite resistance may be read in both directions. A normal diode's resistance will be infinite in one direction and several hundred k Ω in the other direction.

4. Magnetron

For complete magnetron diagnosis, refer to "Measurement of the Microwave Output Power." Continuity checks can only indicate an open filament or a shorted magnetron. To diagnose for an open filament or a shorted magnetron,

- 1) Isolate magnetron from the circuit by disconnecting the leads.
- 2) A continuity check across magnetron filament terminals should indicate 0.1 Ω or less.
- 3) A continuity check between each filament terminal and magnetron case should read open.

5. Fuse

If the fuse in the primary and monitor switch circuit is blown when the door is opened, check the primary and monitor switch before replacing the blown fuse. In case the fuse is blown by an improper switch operation, replace the defective switch and fuse at the same time. Replace just the fuse if the switches operate normally.

4. COMPONENT ACTION

COOKING MODE		MAGNE- TRON	MAIN HEATER	SUB HEATER	CONVEC- TION FAN

11. EXPLODED VIEW AND PARTS LIST

1. DOOR ASSEMBLY

Refer to 6. Disassembly and assembly.

2. CONTROL PANEL ASSEMBLY

Refer to 6. Disassembly and assembly.

3. TOTAL ASSEMBLY

✓ **Caution** : In this Manual, some parts can be changed for improving, their performance without notice in the parts list.
So, if you need the latest parts information, please refer to PPL(Parts Price List) in Service Information Center
(<http://svc.dwe.co.kr>).

12. PRINTED CIRCUIT BOARD

CIRCUIT CHECK PROCEDURE

1. Low voltage transformer check

The low voltage transformer is located on the P.C.B.

Measuring condition: Input voltage: 230V / Frequency: 50Hz

Terminal	Voltage(load)	Voltage(no load)
7-8-9	DC 13.5 V	AC 37 V

NOTE

1. Secondary side voltage of the low voltage transformer changes in proportion to fluctuation of power source voltage.
2. The allowable tolerance of the secondary voltage is within $\pm 5\%$ of nominal voltage.

2. Voltage Check

- Key check point

NO	CHECK POINT	REMARK
1	IC1 PIN 2, 3, 4	5VDC $\pm 5\%$
2	IC1 PIN 10	T : 20 ms(50Hz)
3	IC1 PIN 2 OR 3	T : 250 ns(4MHz)

- Check method

NO	MEASURE POINT	WAVE FORM	REMEDY	REMARK
1	MP1	DC 5V $\pm 5\%$	Replace VL1,EC1,C4,C5	NO LOAD
2	MP2	DC 12V $\pm 20\%$	Replace D14,D15,EC2,R21,D12	NO LOAD

NOTE: Each measure point must be measured with GND points.

MEASUREPOINT

3. Case of no microwave oscillation

1) When touching M/W button, oven lamp turns on and Fan motor and turntable rotate, and cook indicator in display comes on.

*Cause: **RELAY 1** does not operate.

STATE	POINT A	POINT B
RELAY 1 ON	+5V DC	GND
RELAY 1 OFF	GND	12V DC

2) When touching M/W button, oven lamp does not turn on and turntable motor does not rotate but cook indicator in display comes on.

*Cause: **RELAY 2** does not operate.

STATE	POINT A	POINT B
RELAY 2 ON	+5V DC	GND
RELAY 2 OFF	GND	12V DC

- Check method

3) When touching M/W button, oven lamp turns on and fan motor does not rotate but cook indicator in display comes on.

*Cause: **RELAY 2** does not operate.

STATE	POINT A	POINT B
RELAY 2 ON	+5V DC	GND
RELAY 2 OFF	GND	12V DC

- Check method

4. Case of no heating of top heater main.

When touching GRILL or COMBI or CONVECTION button, oven lamp turns on and fan motor and turntable rotate, and cook indicator in display comes on.

*Cause: **RELAY 3** does not operate.

STATE	POINT A	POINT B
RELAY 3 ON	+5V DC	GND
RELAY 3 OFF	GND	12V DC

5. Case of no heating of top heater sub.

When touching GRILL or COMBI or CONVECTION button, oven lamp turns on and Fan motor and turntable rotate and cook indicator in display comes on.

*Cause: **RELAY 4** does not operate.

STATE	POINT A	POINT B
RELAY 4 ON	+5V DC	GND
RELAY 4 OFF	GND	12V DC

6. Case of no stopping of the count down timer

When the door is opened during operation, the count down timer does not stop.

- Check method

STATE \ POINT	A	B
DOOR OPEN	OPEN	+5V DC
DOOR CLOSED	CLOSE	GND

CHECK NO	METHOD	REMEDY
1	Check the stage(ON,OFF) of the door open monitor switch by resistance measurement.	Replace door open monitor switch.

13. P.C.B. CIRCUIT DIAGRAM
